DISABLED PARKING

There are three disabled parking bays next to the patient entrance to the dental centre which can be accessed via a ramp to the left of the main door.

The patient car park is free of charge situated at the front of the building. There is also adequate space for patients to be dropped off at the main entrance to the dental centre.

OUTSIDE ACCESS FROM THE CAR PARK

At the top of the main access ramp there are automatic doors which open into a spacious entrance vestibule.

INSIDE ACCESS

The entrance vestibule is well lit, and has a second set of automatic doors which lead to a reception area where patients are personally greeted by our receptionist.

RECEPTION

On entering the dental centre, reception is straight ahead. The flooring is level with neutral wooden effect vinyl flooring in reception and treatment areas. There are hearing loops available for those that need assistance with hearing.

WAITING ROOM

The West Country Dental Care waiting room is to the right of reception and is also level with neutral wooden effect vinyl flooring. The Brighter Dental waiting room is situated to the left of the main reception which is accessed by way of three steps or a lift. Both waiting areas are well lit.

LIFT

There is a lift situated behind the main reception for any patients who may have difficulty in accessing the Brighter Dental waiting area via the steps.

TREATMENT ROOMS

All treatment areas are accessed directly from the reception areas. The treatment areas have level flooring with neutral wood effect vinyl covered floors. All doorways to treatment areas are accessible widths, with the doorway to Surgery 1 slightly wider to accommodate the wider wheelchair users.

WHEELCHAIR TIPPER / BARIATRIC CHAIR

There is a dual-purpose dental chair in Surgery 1. It allows patients who have limitations in health care due to physical size, health and mobility to be safely treated on the same dental chair as all other patients.

The chair is also a wheelchair tipper for patients who are unable to transfer into a routine dental chair. The chair can accommodate larger than average wheelchairs.

TOILET FACILITIES

In the West Country Dental Care waiting area there are two patient toilets and a specially adapted changing facility for those that need extra support when going to the bathroom.

This doubles as an adult changing area with a mobile hoist if transferring to the adult changing table and baby changing facility. These are all easily accessed with no ramps or stairs.

There is a separate patient toilet situated in the Brighter Dental waiting area also easily accessed with no ramps or stairs.

ADDITIONAL INFORMATION

Patient letters can be made available in other formats such as large print (on request at reception).

All staff have disability awareness training.

Interpreters can be provided with appropriate notice.

Hearing Loops are available for those patients who may have difficulty with their hearing.

Assistance or support dogs are welcomed in the reception areas. If a patient requires more assistance when entering clinical areas, a risk assessment will be completed by the dentist for the individual patient and support dog.

A nurse or member of the reception team will support and guide that patient into the clinical rooms and will remain with them throughout treatment and guide them back to reception on completion.
